

# SKYRAIL®

A formwork system developed for one-way ribbed slabs  
for residential or industrial buildings

casseforme  
formwork

## SKYRAIL ADVANTAGES

### ■ SAVINGS

Thanks to the radical reduction of consumables, the system is amortised after a just few pours.

### ■ SAFETY

SKYRAIL is a completely self-supporting system that does not need any special safety features. It can be erected from below, maximising safety on the job site.

### ■ TECHNOLOGY

SKYRAIL allows to pour lighter slabs without having to incorporate any filler materials between the ribbing, thus giving the greatest structural efficiency.

### ■ DISMANTLING

As concrete does not stick to plastic cleansing of the formwork is done using just some water: the use of detergents and releasing agents is not necessary.

### ■ REUSABLE

Thanks to its robustness SKYRAIL can be reused.

### ■ HANDLING

The system is extremely light, it can be quickly disassembled and easily handled on site without requiring a crane. SKYRAIL can be compactly stored in limited space and does not suffer moisture.

### ■ FLEXIBILITY OF USE

The hollow created by SKYRAIL can be used for the passage of cable, wires, sanitary fittings and for the installation of lights and air conditioning systems.

### ■ RESULTS

Slabs made with SKYRAIL can be left in sight or plastered with standard paneling.

# SKYRAIL COMPARISON

SKYRAIL

TRADITIONAL HOLLOW CLAY BLOCK SLAB

CHARACTERISTICS	SKYRAIL	HOLLOW CLAY BLOCK
SAFETY	The system is fully self-supporting	Requires a slab form underneath and other applicable safety features
SAVINGS	The system is completely amortised after just a few pours	The filler material is a consumable incorporated in the pour
USAGES	<b>REUSABLE</b>	<b>JUST ONE USE</b>
LOAD BEARING	Eliminating the weight of incorporated filler materials the slab increases its load bearing capacity.	The dead weight of the filler material decreases the load bearing capacity of the slab
ERECTION	Its low weight makes the system easy and fast to erect.	The weight and fragility of the filler material make it slow to install
STORAGE	Can be stored compactly in limited space and does not suffer moisture.	Needs a large storage area
SERVICES	The installation of services, sanitary fittings, cables and so on becomes very easy.	The poured slab needs extra preparation for the installation of services

## SKYRAIL ITEMS

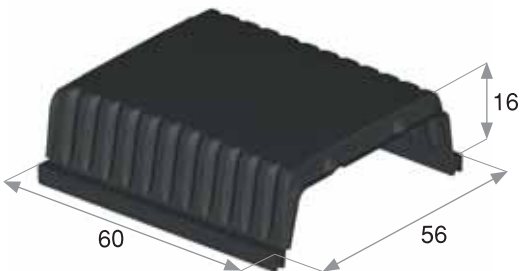

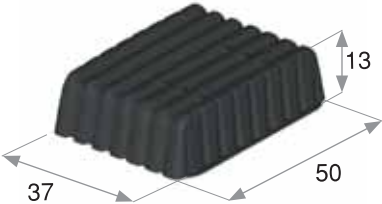

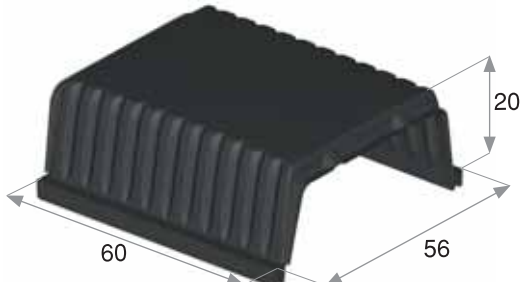

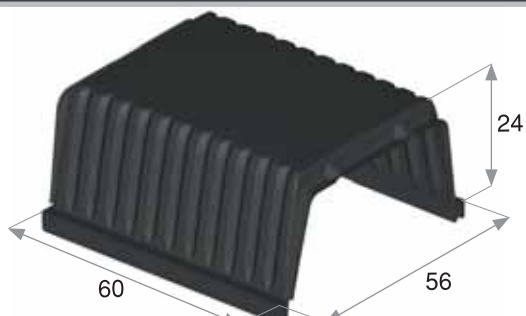

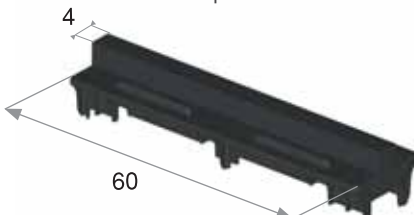

### SKYRAIL

Compensation with SKYBLOCK® and GEOPANEL® or wooden planks

# SKYRAIL ITEM CHARACTERISTICS

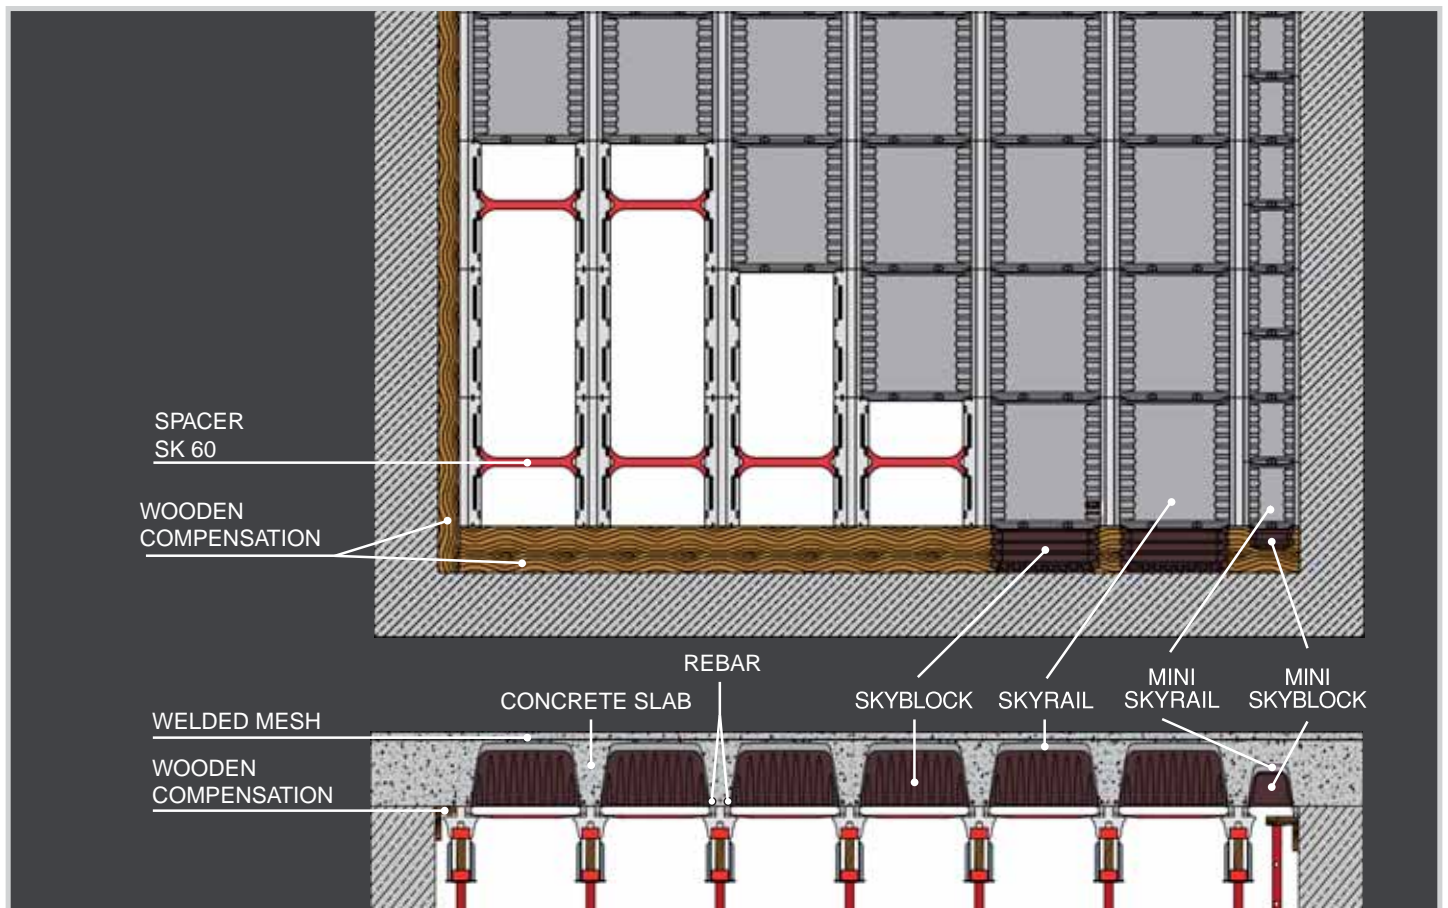

1	<p><b>SKYRAIL H16 . L 60 cm</b>  <b>MATERIAL: ABS WEGHT: 2.50 Kg</b></p> 	<p><b>SKYBLOCK H16 . L 37 cm</b>  <b>MATERIAL: ABS WEIGHT: 1.10 Kg</b></p> <p>Compensation element</p> 
1	<p><b>SKYRAIL H20 . L 60 cm</b>  <b>MATERIAL: ABS WEIGHT: 2.70 Kg</b></p> 	<p><b>SKYBLOCK H20 . L 37 cm</b>  <b>MATERIAL: ABS WEIGHT: 1.30 Kg</b></p> <p>Compensation element</p> 
1	<p><b>SKYRAIL H24 . L 60 cm</b>  <b>MATERIAL: ABS WEIGHT: 3.00 Kg</b></p> 	<p><b>SKYBLOCK H24 . L 37 cm</b>  <b>MATERIAL: ABS WEIGHT: 1.50 Kg</b></p> <p>Compensation element</p> 
	<p><b>MINI SKYRAIL H16 - L 30 cm MATERIAL: ABS WEIGHT: 0.71 Kg</b></p> 	<p><b>MINI SKYBLOCK H16 - L 14,4 cm MATERIAL: ABS WEIGHT: 0.30 Kg</b></p> <p>Compensation element</p> 
4	<p><b>SPACER MATERIAL: ABS</b></p>  <p>SK60 - L 60 cm SK30 - L 30 cm</p>	<p><b>H20 BEAM with end reinforcement</b>  <b>MATERIAL: wood</b></p> 
3	<p><b>T-BEAM . L 60 cm MATERIAL: ABS WEIGHT: 1.70 Kg</b>  Placed on H20 beams ensures the precise and safe installation of SKYRAIL</p> 	<p><b>FORKHEAD MATERIAL: steel</b></p>  <p><b>PROP high load bearing capacity</b>  <b>MATERIAL: Steel</b></p>
